

## Soil Testing Laboratory

KVK has the facility to test 12 parameters in soil, those are pH, EC, organic carbon, available N, P and K, S, Zn, Fe, Mn, Mo and B. Soil samples are collected on grid basis from farmers field, OFT and FLD fields and as submitted by other farmers. Soil health card is issued to the farmers in which soil test based fertilizer recommendation is given. SHC is issued in Odia language for convenience of local farmers. Mini soil lab, Mridaparikshyak is also used for testing of soil sample.

## Year wise achievements of Soil Testing Lab

Year	No. of Soil sample tested	Number of Soil health card distributed
2017-2018	125	150
2018-2019	68	150
2019-2020	410	09
2020-2021	0	10
2021-2022	90	10
